

## Health Performance

This application assesses your herd's health both in the short and long term, helping you enhance your farm's overall health performance. If you have a DeLaval VMS™ equipped with Milk Cell Analysis (MCA), then the somatic cell counts will synchronize automatically to DeLaval Plus Health Performance, further empowering the use of your data.

### The challenge

- Are your treatments being effective?
- Do you know if the season influences the health of your cows?
- Are your fresh cows more vulnerable to certain diseases?
- Are you getting the most out of your ability to record your somatic cell counts?

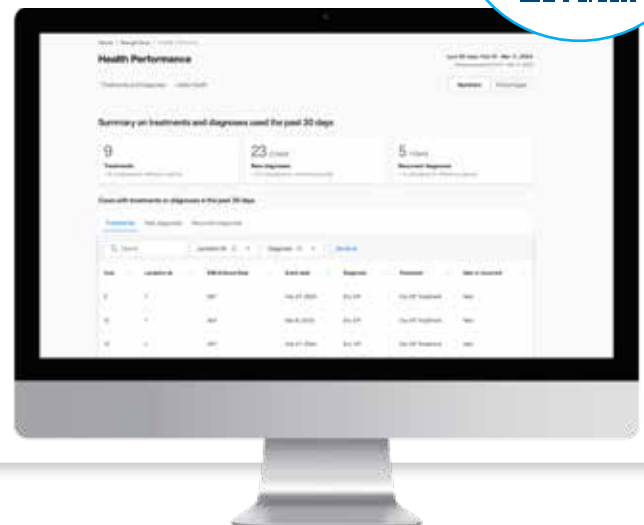

SEE HOW IT WORKS

### The solution

- Identify any recurring diseases in your herd and evaluate the effectiveness of the treatments.
- Improve cow management by identifying problematic cows more easily.
- Focus on your cows' udder health with an easy-to-understand somatic cell count overview.
- Compare the health performance of your herd over the past 13 months by lactations or days in milk.

### The result

Go  
Faster

Get a quicker understanding of your herd's health performance trends over time.

Get  
Closer

Gain deeper insights into the somatic cell count of your herd, empowering you to enhance the udder health of your cows.

Go  
Further

Make data-driven decisions to identify problematic cows and address their issues, taking your herd's performance further.
