

# Reproduction Performance

Everything starts with reproduction, and this application helps by providing precise KPIs, measurements and reporting to help you stay on track of your reproductive goals.

## The challenge

- Are you getting cows pregnant on time?
- Are you getting cows pregnant with as few inseminations as possible?
- Are you optimizing days in milk?
- Are you maximizing the quality of your replacements?

## The solution

- Identify opportunities quickly with a goal led overview. See instantly if you are ahead or behind your target.
- Modern KPIs and graphical overviews of the key data – conception rate, insemination rate, pregnancy rate, turnover rate, pregnancy rate heifers, removal rate by days in milk.
- Focus on your heifers' fertility with specific reporting.
- Drill down functionality, customizable time frames, parity, cycle view or time view to fit your data analysis needs.
- Clear overview of the costs and production implications associated with early removal.

SEE HOW IT WORKS

## The result

**Go Faster**

Track the interval between heat and pregnancy to help get cows pregnant faster.

**Get Closer**

By getting closer to the data, and to the causes of reproductive performance, you can improve your productivity.

**Go Further**

With faster reproduction performance, everything else flows, allowing you to take your productivity further.

**Get started**
