

DeLaval Cow mattress M55R

Our best
mattress

Proven
quality, tested
for more than
10 years

Water-
repellent
wrapped
foam

100%
seamless

The same mattress as M45R but with a thicker foam. DeLaval cow mattress M55R has been designed with a 3.5 mm rubber top cover for optimal grip and long-lasting comfort.

The cover is used in combination with a 50 mm wrapped foam to provide a 100% sealed mattress solution that offers excellent traction and durability. DeLaval M55R is cow-friendly as it doesn't contain any visible nail or plug attachments which prevents dirt from getting under the cover, making it easier to maintain a more hygienic environment.

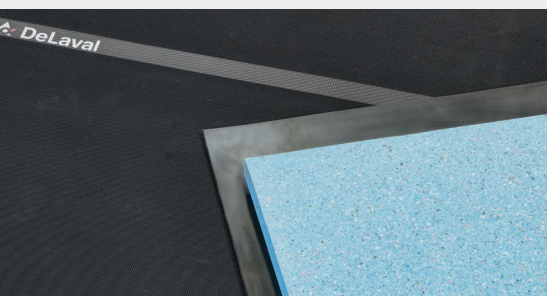

"We replaced our old 20mm rubber mats with DeLaval Cow mattress M55R about one and a half year ago. This resulted in an increased resting time between two to three hours per day. It also resulted in a better hoof care and an increased milk production of 2-3 Kg per cow per day"

-Christian Mark, Thisted in Denmark.

DeLaval

Cow mattress M55R

50mm wrapped foam for high compression and comfort.

Seamless with no visible screws in the back

Measurements	
Thickness	55mm
Length	50-700mm
