

DeLaval

Rubber mat RM21BS

Good drainage

Easy to clean

Anti-slip pattern

Prevent dirt accumulation

RM21BS mats are thick, flexible rubber mats for stallion barns or loose housing stalls.

The studs underneath make the mat comfortable and flexible for good shock absorption. The mat is sloped to facilitate surface urine drainage. The back of the mat has a more solid, closed section to limit the passage of dirt. DeLaval RM21BS is easy to install and has no sharp edges. A large number of sizes are available to fit from young stock to dairy cows.

Individual results may differ; information does not constitute warranty/guarantee of service or performance.

DeLaval

Rubber mat RM21BS

Closed section to limit the passage of dirt.

Studs underneath for good shock absorption.

Measurements

Thickness	21mm
Length	1500-2200mm
