

DeLaval

Rubber mat RM32

**Great
compression**

**Easy to
clean**

**Anti-slip
surface**

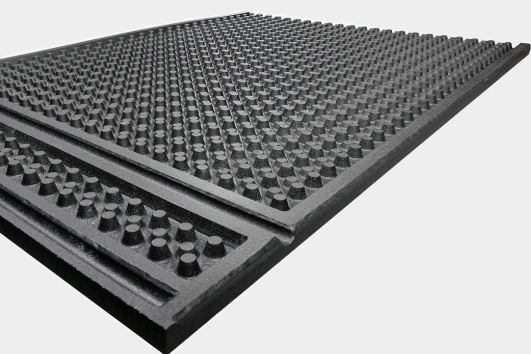

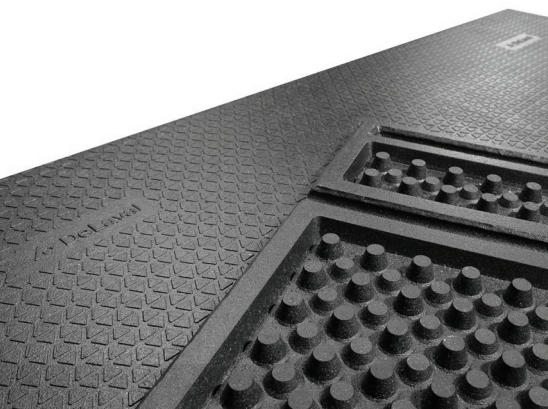

**Easy
installation**

Especially in stanchion barns, the expectations on durability are high. At the same time the rubber mats should give the comfort a milking cow needs.

The DeLaval rubber mat RM32 combines high durability with good comfort. This makes it the ideal solution for both stanchion barns and loose housing. Due to the two versions the rubber mats fits many cubicle sizes.

DeLaval

Rubber mat RM32

Comes in two versions:

RM32S with straight sides. To be used when there is dividers fixated to the floor

RM32P with puzzle sides. To be used for seamless interlinking. When there is no dividers or free hanging dividers.

Gives good grip for standing up. Easy to clean as puzzle connections make it seamless with no expansion - even on hot summer days.”

- Farm manager Jane, Kesa-Agro OÜ, Estonia.

Measurements

Thickness	32mm
