

DeLaval

Slatted floor coverage SFC

DeLaval slatted floor coverage SFC is a high-quality, long-lasting rubber mat for slats.

The durable DeLaval SFC-F and SFC-S are suitable for a wide range of slatted floors. DeLaval slatted floor coverage SFC-F is easy to clean with robot or conventional manure scrapers. The sloped DeLaval slatted floor coverage SFC-S is the solution for areas where scrapers don't go, as the slightly curved surface slopes towards the gaps between the slats for good drainage. What's more, no fixing hardware is required which makes the installation simple and quick. Installed in over 6000 farms across the globe.

"We invested in DeLaval SFC for slatted floor at the waiting yard in front of the VMS milking robot. We did the installation ourselves. Thanks to the rubber studs the installation was easy and went fast just using a hammer. My experience is that the mat has a good grip and the cows now walk more comfortable. It also works well with our manure robot"

-Simon T. Nielsen, Give in Denmark

DeLaval

Slatted floor coverage SFC

One mat covering
two slats and one gap

Built in slopes on both
sides of the mat towards
the slats gaps

Measurements
