

Milking Performance

If you are using DeLaval parlours and rotaries, this application is a crucial farm management tool that supports your milking routines by providing you with a comprehensive analytical overview, enabling you to make data-driven improvements.

The challenge

- Are you concerned about overmilking your cows?
- Is your milking parlour reaching maximum potential?
- Do you have concerns about your milking preparation routine?
- Would you like to set specific milking performance related goals?

The solution

- Focus on efficient milking performance by knowing the average milking time per group of cows.
- Access the whole picture of your milking performance at any time with graphical and highly user-friendly KPI's.
- Be able to customise your farm performance goals and compare your results with goal trends.
- Have an overview analysis that can complement milk performance reports from DelPro FarmManager.

The result

Helps you to identify improvement opportunities to enable a more efficient milking routine.

By having access to your milking performance KPI's, you can improve your workforce's competencies.

Having clear indicators of performance trends will enable you to stay on track with your milking performance goals.

The experience

"This application allows me to access the full picture of the performance of the milking parlour and my milkers at any time. In this way, it helps me improve the performance of both."

Kyriokos Kallenos, Kallenos Brothers Farm, Cyprus
