

## Sync

Easily synchronise DelPro™ FarmManager cow event data with your national body through Sync. Save time and effort keeping your important data up-to-date.

### The challenge

- Are you able to keep all of your required cow data up-to-date with your national body?
- Do you have double data entry work you would like to eliminate?
- Have you ever forgotten to share your cows' calving data on time and as required by law?
- Are you starting with a new DelPro FarmManager and not wanting to add cow data manually?

### The solution

- All you have to do is record the cow events, and Sync is there to help you ensure the data is shared with your national body or back into DelPro FarmManager.
- At your scheduled time, Sync shares data on milking sessions, milk production, inseminations, pregnancy, health treatments and more.
- Reduce your manual work when starting your DeLaval System – as Sync can import your cow data into DelPro FarmManager.
- Every country has its own data-sharing needs, and Sync helps you ensure that your reported events are ready to be synchronised.

### The result

**Go  
Faster**

Your DeLaval system can start faster without the need of any manual data entry.

**Get  
Closer**

By getting closer to your national body, you can have peace of mind that your important data is up to date.

**Go  
Further**

Having one place for all cow data enables you to make those essential decisions that'll take your performance further.

### The experience

"Sync is brilliantly easy to use to simplify our workload. There's no more double registration or searching for files to upload for us."

- Noralv Filseth, Norway.
