The swing-over that will help you grow
DeLaval MidiLine™ ML3100

High-end design. Top-tier efficiency

The sleek, ultramodern lines of the new DeLaval MidiLine™ ML3100 are a reflection of its advanced farm management capabilities. In other words, not only is it a pleasure to look at, but because it’s packed with time-saving options, it’s also a pleasure to work with.

More management – more cows

Many farmers are increasing the size of their herds. Others simply want to reduce milking times. Whatever your needs, DeLaval MidiLine™ ML3100 – with its wide choice of farm management options – can help you get more done faster.

With DeLaval ML3100, you decide on the level of management automation that suits you. As your herd grows, you can increase the level step by step: from automated cluster removal, to full integration with DeLaval DelPro™ Farm Manager.

Easy to use

The swing-over arm has been designed to boost throughput and make life easier: whether for you or hired hands. By combining the swing-over arm with our light-weight, industry-leading top flow cluster, you can improve workplace comfort and ergonomics. In addition, since each arm has its own indicator light, you can check milking status or alarms from anywhere in the parlour.

Easy to maintain

The design of the swing-over arm ensures fast and easy maintenance. With plug and play replacement of wearing parts, you can finish routine maintenance tasks in a matter of minutes. DeLaval ML3100 is also easy to keep clean thanks to its sleek housing.

Invest in peace of mind

An integrated system from one supplier: that’s the advantage of investing in a DeLaval milking system. Whether it’s a question of milking or feeding, sorting or breeding, the different parts will talk with each other. And work together. Both hardware and software. From day one.

With DeLaval, you also get unparalleled support. Thanks to a global network of representatives and dealers, there is always a trained and certified service technician no more than a phone-call away.

You can get more done with DeLaval MidiLine™ ML3100 because it offers you a higher level of automated farm management. With a range of optional management tools, you can increase productivity and the performance of your herd, while maintaining cow comfort.

Add value with automation

With DeLaval MidiLine™ milking systems, you can add automation as you go –

- DeLaval ID system automates cow identification, collects data and registers actions
- Milk metering provides accurate yield recording for individual cow management
- Sort gates identify and sort cows based on herd management decisions
- Automatic DeLaval body condition scoring BCS identifies incorrect feed balance
- Automated feeding reduces labour and optimises feed utilisation
- Activity metering enables 24/7 automated heat detection
- DeLaval DelPro™ Farm Manager provides the overview needed for making daily management decisions
