Cows get itches and need to be able to scratch. If there is a cow brush close by, they can groom themselves safely and effectively. If not, they will rub against sharp or unsafe objects around the barn to try to rid themselves of parasites.

**Robust grooming**

DeLaval stationary brush SB is designed to provide cows with a convenient, ergonomic and safe way to scratch. The unique design of the spring-based, double-brush unit, includes effective bristles to provide a flexible and robust grooming station for cows.

**Improved health**

Regular grooming with a cow brush promotes blood circulation. This improves cow health and can lead to increased milk production in dairy cows.

**Simple installation**

DeLaval SB is a stand-alone unit and can be easily installed at one or several "grooming points" throughout a barn or outdoors.

DeLaval SB is the perfect complement to DeLaval swinging cow brush SCB and DeLaval mini swinging brush MSB, as it can be installed in areas without electricity outlets or where there is a lack of space.

**Main advantages**

- Provides a safe way for cows to remove skin parasites
- Improves blood circulation
- Can be installed throughout a barn or outdoors
- Suitable for different types of animals: calves, cows, buffaloes and goats

**Key features**

- Robust, galvanised steel construction
- Two long-life brushes
- Flexible, long-lasting horizontal brush
- Unique design and effective bristles

**Don't wait. Contact your dealer to order your DeLaval stationary brush SB today.**
