

# DeLaval InService™ All-Inclusive

KEEPING YOU MILKING AT THE  
**BLUE LINE**

DeLaval

Your milking system, like any hard worker, requires maintenance, servicing and replacement of oils, filters, liners, detergents as well as regular cleaning to **keep it performing at the level you demanded when you purchased it.**

**If you only perform service tasks once you notice a drop in performance you are wasting your hard earned money.**

**If you service your system here, you don't lose performance.**

**If you wait to service your system here:**

- How do you budget for these costs?
- How much productivity was lost?
- Was it worth running the risk of a break-down?

# Make sure that your milking system is running at full power, at all times, on your terms.

With DeLaval InService™ All-Inclusive we will carry out routine maintenance, scheduled servicing and the replenishment of consumables; all for one agreed price and with a payment structure that works for you.

InService All-Inclusive performs key tasks when they are needed and before your performance suffers.

- ✓ One agreed price
- ✓ Peace of mind
- ✓ Easy to budget
- ✓ Consumables included
- ✓ Service & maintenance
- ✓ Liners & tubes
- ✓ Milk filters & oil
- ✓ Cleaning routines & analysis
- ✓ Vacuum & pulsation
- ✓ Delivered on schedule
- ✓ Fully trained technician
- ✓ Teat spray & detergents

## 2000 hour

After 2000 hours or 12 months, whichever occurs first.

- Machine test:** Dry testing of milk system
- Milk contact check:** Clean and replace milk contact surfaces
- Standard service:** Check, clean and replace system components and consumables
- Hygiene optimisation:** Making sure your cleaning system is performing at the optimal level

## Always on

Whenever you need it.

Liners, tubes, detergent, teat spray, filters and oil will all be replaced as required throughout the agreement

## 4000 hour

After 4000 hours or 24 months, whichever occurs first

- Machine test:** Dry testing of milk system
- Milk contact check:** Clean and replace milk contact surfaces
- Standard service:** Check, clean and replace system components and consumables
- Hygiene optimisation:** Making sure your cleaning system is performing at the optimal level

## Ongoing performance optimisation

At the heart of your InService All-Inclusive agreement is the combination of two things only DeLaval can offer:

1. A trained DeLaval technician
2. VPR200 - the very best analysis tool available.

Together, they are the key to ongoing performance improvements that will unlock productivity and animal health gains for you.

## Cleaning Analysis and Action – DeLaval DCA

Cleaning milking equipment is essential for milk quality and with DeLaval DCA you can be certain that when you switch on your cleaning process it is delivering the best quality milk possible, without using too much hot water or detergents.

To do this we use the VPR200 to take readings while the milking system is being cleaned. This detailed data is then analysed to create a set of actions that ensure every aspect of your cleaning process is working correctly.

## Dynamic Milking Analysis and Action – DeLaval DDA

Your technician is able to use the VPR200 to measure the true vacuum levels under the teat by monitoring vacuum during milking – this is known as wet or dynamic testing.

We can also monitor your milking routine and throughput, this is then benchmarked with industry best practices to provide improvement recommendations based on your farm conditions.

# ALL FOR ONE AGREED PRICE

Hundreds of tasks and consumable replacements all performed automatically to keep you where you belong. **Milking at the blue line.**
