Our best Swinging Cow Brush – adapted for beef cattle

We've adapted our best-selling dairy cow brush to meet the needs of beef cattle. With all the features dairy farmers have come to love - the automatic safety features, the long-lasting bristles, the patented cylinder and dual-pivot design – our new swinging brush is also our most robust and perfect for use with long-haired and large horned animals.

- ✓ Robust construction
- ✓ High quality materials
- ✓ Smart safety features
- ✓ Low energy consumption*

Taking a 360° view of your farm with DeLaval Swinging Beef Brush

Farm Profitability

A DeLaval Swinging Brush removes ticks and other parasites, helping to lower your veterinary costs. It can also protect your farm equipment from being used for scratching and being damaged in the process.

Work Efficiency

Our brushes are designed and tested to withstand harsh conditions and frequent use. Their high durability helps them to perform day-in and day-out with minimal maintenance.

Animal Welfare

Cows love the patented dual-pivoting motion of our Swinging Brush as it allows them to reach places that other brushes can't. Your cows will be cleaner, more relaxed, and less likely to injure themselves scratching against farm equipment.

Food Safety

Our Swinging Cow Brushes have been proven to reduce cases of clinical mastitis. It's also true that regular massaging can lead to better gustative meat quality from higher intramuscular fat.

Put the DeLaval Swinging Beef Brush to work for you.
